How to edit Emergency Information

Quick guide for approved OneDrive editors

Do this in OneDrive	Result in the app
Create a root folder	New main tile
Create a subfolder	New secondary tile
Add a .docx file	New content page
Use 01, 02... at the start	Sets order; number is hidden
Add cover.jpg or cover.png	Tile picture
Add another JPG or PNG	Folder gallery
Paste an image into Word	Image appears in place
Start a name with _	Item is not published

Word formatting

Use Word's built-in Heading styles. Headings, lists, tables, links, emphasis, highlighting, text colour and images are retained. Exact fonts and sizes are replaced by the phone layout.

Publish check

1. Check phone numbers, locations, warnings and links.
2. Close Word before expecting a sync; ~$ temporary files are ignored.
3. Open the live app online, refresh when prompted, then test the key page in airplane mode.

Changes normally appear after the next 15-minute sync. For an urgent issue, send the administrator the OneDrive path and file name.
